(Collect Them All!)**

“We all need to be as courageous as Olympia Food Co-op and make a stand against the Israeli government and the unjust treatment of the Palestinian people, whose lives have been made untenable. The human rights violations cannot be ignored any longer, and if our US government cannot make a stand, then the American people need to make the stand.”

“As Chairman of the Norwich Palestine Solidarity Campaign, I salute your brave and principled stand. Our many Jewish members, activists, and friends in East Anglia understand how essential such stands are in the United States. No matter how hard we campaign for justice for the Palestinian people, we know that we need to turn the screw on the Israel economy through the boycott movement, and, most important of all, we need the American people to understand that it is their tax dollars that enable the Israeli Government to occupy and to oppress.”

**Boycott Supporter Quote 35
(Collect Them All!)**

“Just as with the illegal apartheid regime in South Africa, people across the world need to unite in condemning the cruel and corrupt Israeli regime which is in breach of international and humanitarian law with respect to its abuse and ill-treatment of Palestinians both within its own borders and in all the occupied territories.”
